

AAKASH SANGHVI

AI Product Builder • College Instructor

Burnaby, BC • (604) 722-3293 • connect@aakashsanghvi.com • aakashsanghvi.com • linkedin.com/in/aakashsanghvi

PROFILE

AI product builder and post-secondary instructor who teaches the tools he ships with. Currently instructing in Digital Business Management diploma programs at two BC career colleges while running an AI consulting practice and serving as sole developer and product owner of a 20-module enterprise SaaS platform used daily by 40+ staff. MBA (3.81 GPA) and a BrainStation UX Design diploma. Builds project-based courses on one rule: every student leaves with a finished, presentable artifact — an app, a short film, a website, a research deck, or a university-ready portfolio piece.

AI TOPICS I CAN TEACH

Prompt engineering & AI productivity workflows • AI video production (Veo, Runway, HeyGen, CapCut) • AI image generation & digital design (Midjourney, Canva, Figma) • AI-assisted coding (Claude Code, Cursor, Replit) • Build your first AI app • Chatbot & AI agent development • LLM APIs and structured outputs • Python for AI beginners • Machine learning foundations & Kaggle introduction • AI for research and presentations • AI + business innovation projects • AI ethics, evaluation and responsible use • AI portfolio projects for university preparation

TEACHING & INSTRUCTION

Instructor, Digital Business Management • Excel Career College, Vancouver Jan–Feb & May–Jul 2026

- Delivered 24 instructional hours per week across a diploma cohort, covering digital marketing strategy, applied AI tools, analytics and campaign execution.
- Designed and assessed a capstone agency project spanning brand identity, personas, service design, SEO, email marketing, paid search and KPI reporting — every student shipped a complete, client-ready deliverable.
- Built rubric-based assessment and viva-style oral defences for AI-assisted submissions, testing genuine understanding rather than penalising tool use.

Instructor, Digital Business Management • Kootenay Columbia College Mar – May 2026

- Taught seven courses in the DBM diploma programme, including Bookkeeping & Accounting I (APA140), to a cohort of newcomer and career-change students.
- Ran a full instructor-side audit of the college LMS — navigation, gradebook, assessments, communications, attendance and reporting — and delivered a findings report and improvement proposal to the VP Academics & Operations.

Marketing Tutor & UX Lead, Learning Commons • University Canada West 2023

- Tutored graduate students one-on-one in marketing strategy, positioning and campaign analysis, adapting explanations to a highly international, mixed-ability cohort.
- Led the end-to-end redesign of the peer tutoring booking service — cut booking time 60% (5 min → 2 min) and reduced drop-off 40%, and left the team a reusable UX framework.

PRODUCT & TECHNOLOGY EXPERIENCE

Digital Transformation Consultant • Tops Lighting, Burnaby, BC 2025 – Present

- Sole developer and product owner of FieldOps OS — a 20+ module enterprise operations platform (Next.js 15, TypeScript, Supabase, Vercel) covering work orders, dispatch, timesheets, billing, RBAC and a client portal across 6+ user roles.
- Shipped two production AI engines: a natural-language reporting tool that turns plain-English questions into validated SQL and composed dashboards, and a multimodal work-order generator that reads email, PDF and voice input — both gated behind human confirmation.
- Ran on-site discovery with dispatchers and field technicians and translated observation into shipped features on a same-day cycle.

Founder & AI Product Builder • Moksh Digital (1563655 BC Ltd.), Burnaby, BC 2024 – Present

- Runs an AI transformation practice for BC small and mid-sized businesses on an ASSESS → ACTIVATE → BUILD model, from readiness audits through to shipped production systems.

- Delivers client products end to end — discovery, UX, build and handover — including headless CMS platforms, AI intake automation and compliance-first SaaS tooling.
- Leads a small distributed product team (developer and QA), setting scope, standards and review gates.

Founder & Product Lead · EduStation — B2B EdTech SaaS

2020

- Converted a physical coaching business into a digital learning platform during lockdown: MVP in 60 days, 5,000+ paid users, 100% retention of the existing student base, and 20+ white-label partner institutes onboarded.

Earlier Career — General Management & Marketing · Canada & India

2012 – 2024

- General Manager, Katzie Development Corporation — \$5M+ project portfolio, team of 7. Prior digital marketing leadership roles across education and retail, spanning SEO, paid media, analytics and business development.
